PROFESSIONAL SUMMARY

With 6+ years of international experience across software engineering, conversational AI, web and mobile development, technical project management and digital product development, I bring together two worlds : education and technology.

Experienced with JavaScript, Node.js, React, REST APIs, MongoDB, SQL, AWS, Git and Agile environments, with hands-on experience developing conversational AI applications and multilingual Natural Language Understanding (NLU) experiences for Samsung Bixby. Combines technical development with language, education, product development and entrepreneurship.

I have worked in international environments with Huawei, Samsung/HARMAN and Apple, collaborating with multidisciplinary teams on software development, conversational AI, localisation and user-focused digital products.

My background combines strong technical expertise with communication, organisation and pedagogy..

TECHNICAL SKILLS

AI: Conversational AI, Natural Language Understanding (NLU), multilingual AI assistants

Programming & Web: JavaScript, Java, Swift, HTML, CSS, Python

Frontend & Backend: React.js, Node.js, REST APIs, web and mobile development

Databases & Cloud: MongoDB, PostgreSQL, SQL, AWS

Tools & Methods: Git, Jira, Agile, Scrum

PROFESSIONAL EXPERIENCE

Technical Entrepreneur / Founder | Izzy Speak English | Paris, France | May 2026 – Present

- Developing a digital English coaching platform for professionals and corporate clients.
- Designed and launched the online platform, including website architecture, user experience and digital content.
- Planned and managed the project from concept through deployment and continuous product improvement.
- Developed a scalable coaching model combining online resources, individual coaching and corporate workshops.
- Combine technical development with user research, product strategy, communication and customer needs.

English Teacher & Language Programme Designer | Sainte-Ursule Louise de Bettignies / Cerene Léon Delagrange |

Paris, France | Sep 2023 – Present

- Designed and delivered tailored English and Spanish learning programmes for children, young adults and professionals.
- Developed digital and educational resources adapted to different learning needs.
- Strengthened communication, coaching and presentation skills through teaching and business development.

Founder / Software Developer | Isabelle Bidou SASU | Paris, France | Sep 2022 – Oct 2023

- Designed and developed web-based software solutions using JavaScript, React, Node.js and MongoDB.
- Managed projects from technical conception through implementation.
- Combined software development with client requirements, product thinking and problem-solving.

IT Project Manager | Dedalus | Le Plessis-Robinson, France | Jun 2021 – Dec 2021

- Coordinated development activities within an Agile software team working on healthcare applications.
- Participated in sprint planning, issue tracking and software delivery.

- Supported cross-functional communication between technical and non-technical stakeholders.
- Used Jira and Git within an Agile development environment.

Bixby Capsule Developer — Conversational AI | HARMAN International (Samsung) | Paris, France | May 2018 – Sep 2020

- Developed conversational AI applications for Samsung Bixby using JavaScript and the Bixby development platform.
- Designed, trained and optimised Natural Language Understanding (NLU) models for multilingual AI assistants.
- Developed and refined conversational experiences based on user intent and language understanding.
- Collaborated with product managers, linguists and software engineers to deliver intelligent voice experiences.
- Worked at the intersection of software development, artificial intelligence and multilingual user experience.

Localization & QA Engineer | GlobeTech (Apple) | Cork, Ireland | Mar 2017 – Oct 2017

- Performed localisation, linguistic validation and quality assurance for Apple software products.
- Executed runtime testing across multiple Apple devices for the French-speaking market.
- Identified, documented and communicated software issues to support product quality.

Software Developer | Huawei | Cork, Ireland | Jul 2013 – Mar 2016

- Developed proof-of-concept web and mobile applications supporting indoor and outdoor geolocation technologies.
- Designed and implemented software using Java, JavaScript, Android, Swift, PostgreSQL and web technologies.
- Collaborated with engineering teams to deliver demonstration platforms for customers and technical stakeholders.
- Participated in technical discussions, solution design and software delivery.
- Worked across software development and technical stakeholder communication in an international engineering environment.

EDUCATION

National College of Ireland — Higher Diploma in Web Technologies, Computer Science

Griffith College Cork — Higher Diploma, Computing Science

University of Perpignan — Doctoral degree, Sociology

University of Perpignan — Languages and Management Studies

LANGUAGES

English | French | Spanish
